

WASHINGTON STATE DEPARTMENT OF
Natural Resources

Peter Goldmark - Commissioner of Public Lands

Essential Support Function #4 Firefighting

Co-Lead with Washington State Patrol

- Five Type 2 Interagency Incident Management Teams
- Situation Reports
- Coordination with federal firefighting agencies

DNR Fire Program

Protects 13 million acres of private, tribal, & state forestlands from wildfire

- ▶ Wildfire prevention
- ▶ State's largest 'on-call' fire department
- ▶ Coordinates fire response with federal, local, & other state agencies

Mobilization

1. Incident

2. Local resources exhausted

3. Request additional resources

4. Request resources from neighboring regions and agencies

5. IMT & mobilization resources arrive

6. Identify resources from the broader geographic area and NW Compact

Partner Agencies

Dept of Transportation

- Traffic Control on State Highways,

Military Department

- National Guard, Air Guard

Parks and Recreation

- Base camp locations

Department of Corrections

- Officers, Inmates for fire line & kitchen support

Department of Fish & Wildlife

- Air attack platform, equipment on DFW Lands

Department of Ecology

- Smoke management, helicopter dip site info

Federal Partners

Department of Interior

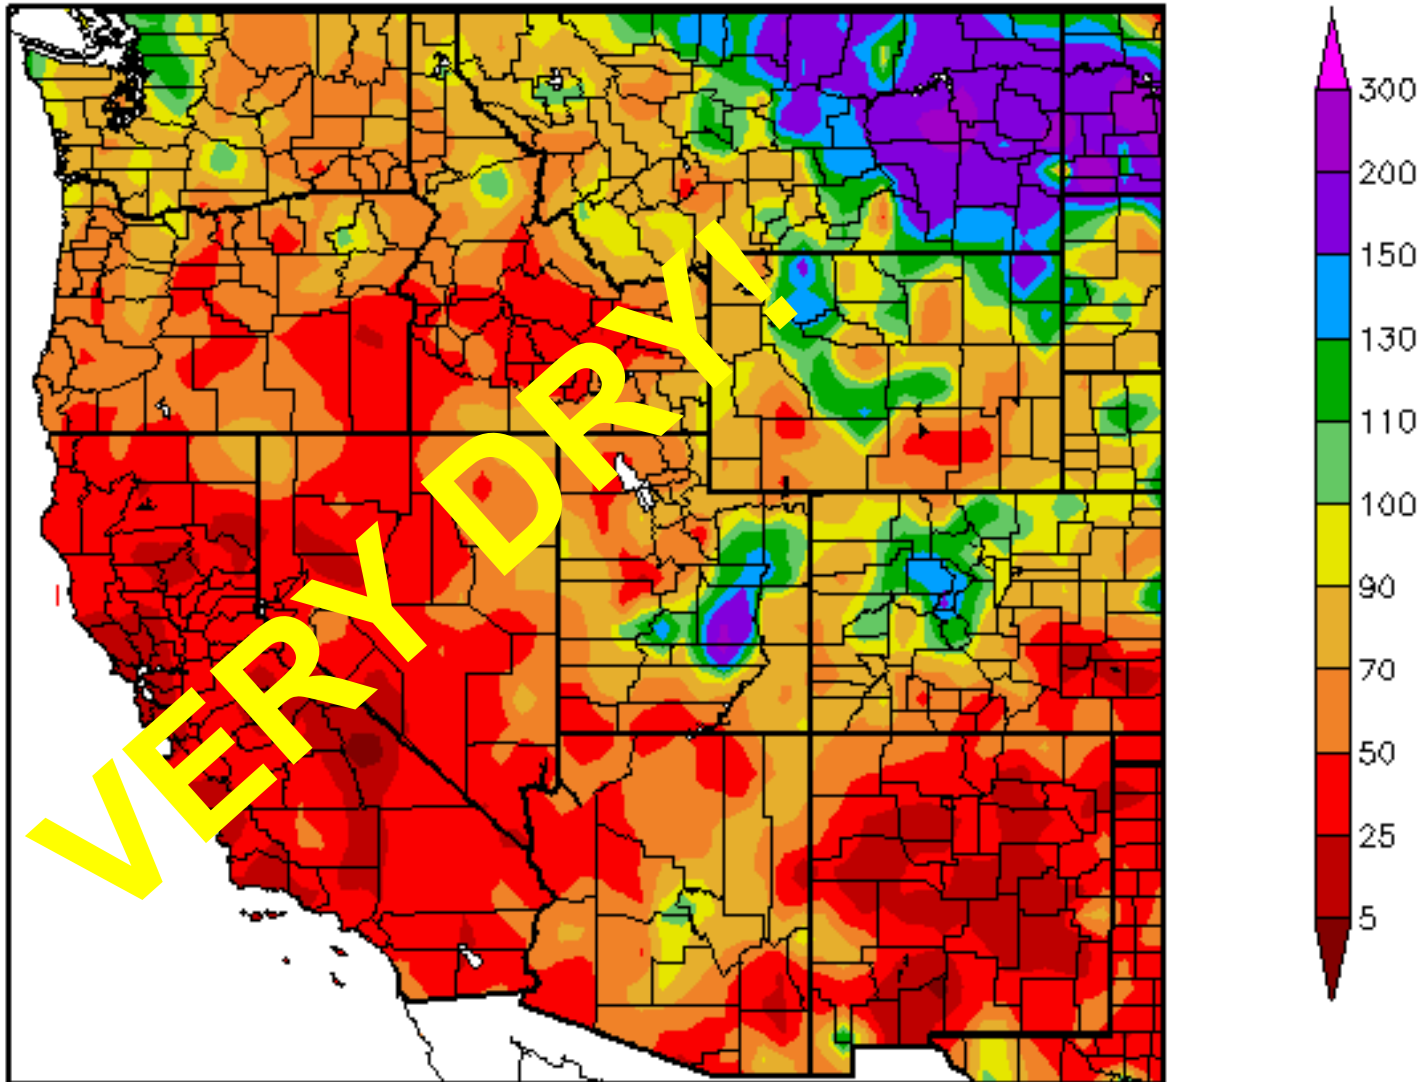

Department of Agriculture

Climate summary

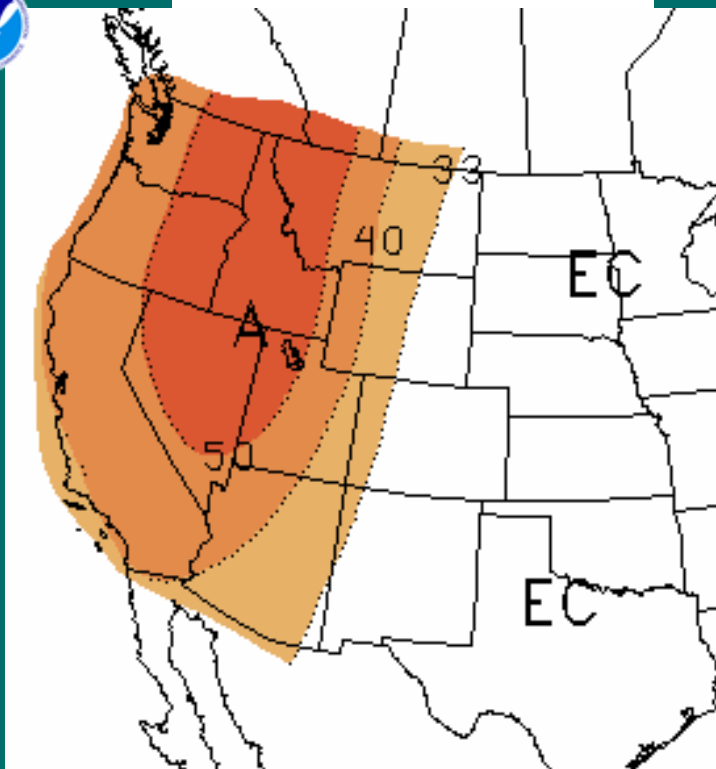

Precipitation observed *since January 1st 2013*

Accumulated precipitation percentage of normal

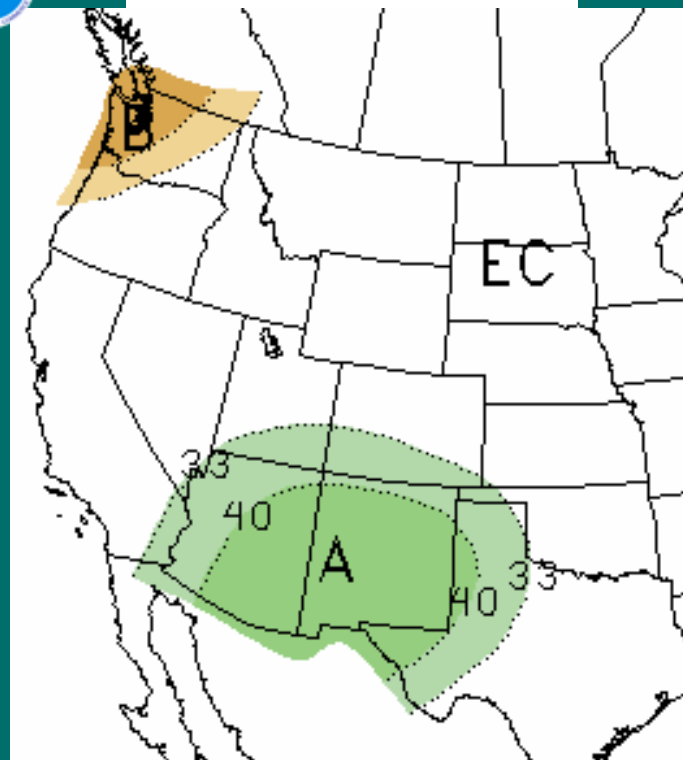

Temperature and Precipitation Outlook July 2013

Temperatures

Probably unusually warm over much of the western US

Precipitation

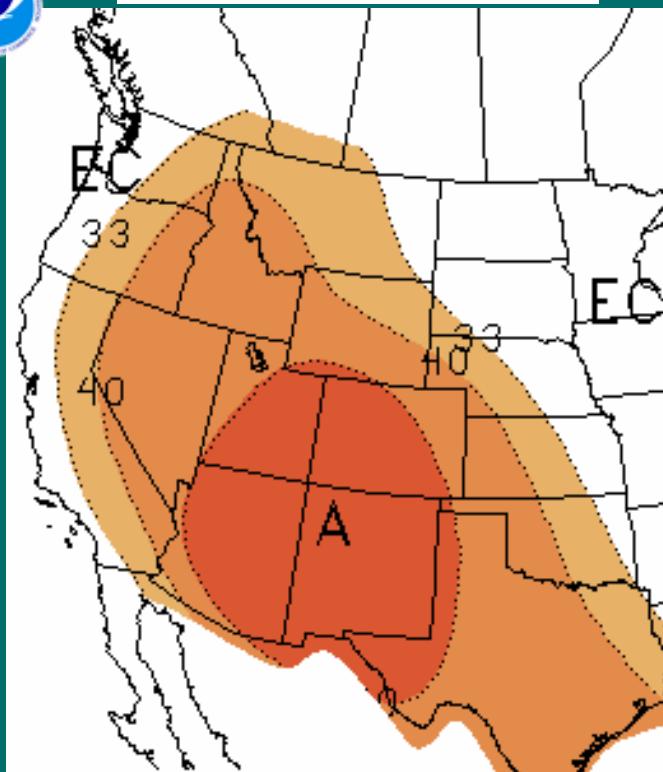

Likely drier than usual over Washington

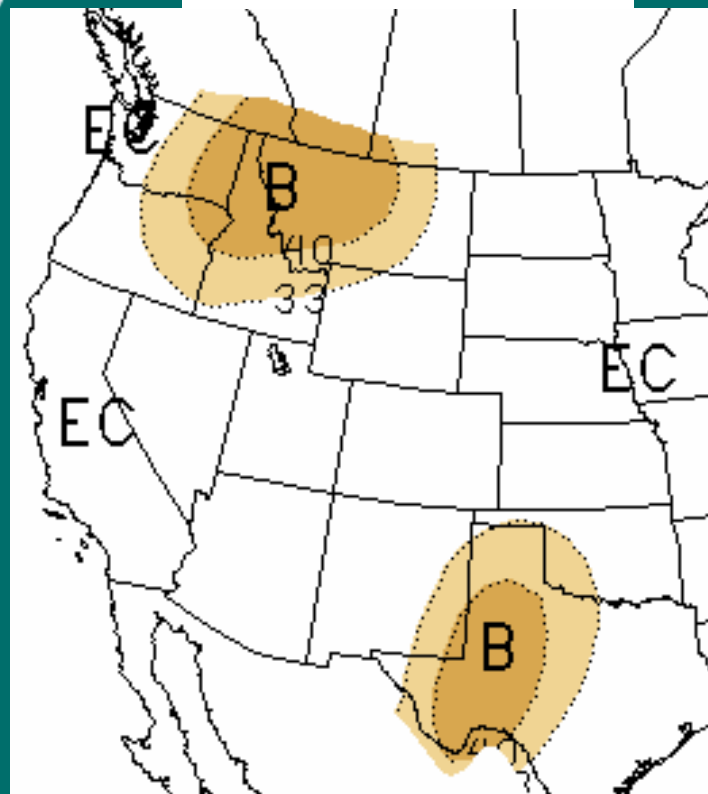

Temperature and Precipitation Outlook August, September, October 2013

Temperatures

Probably unusually warm over much
of the interior western US

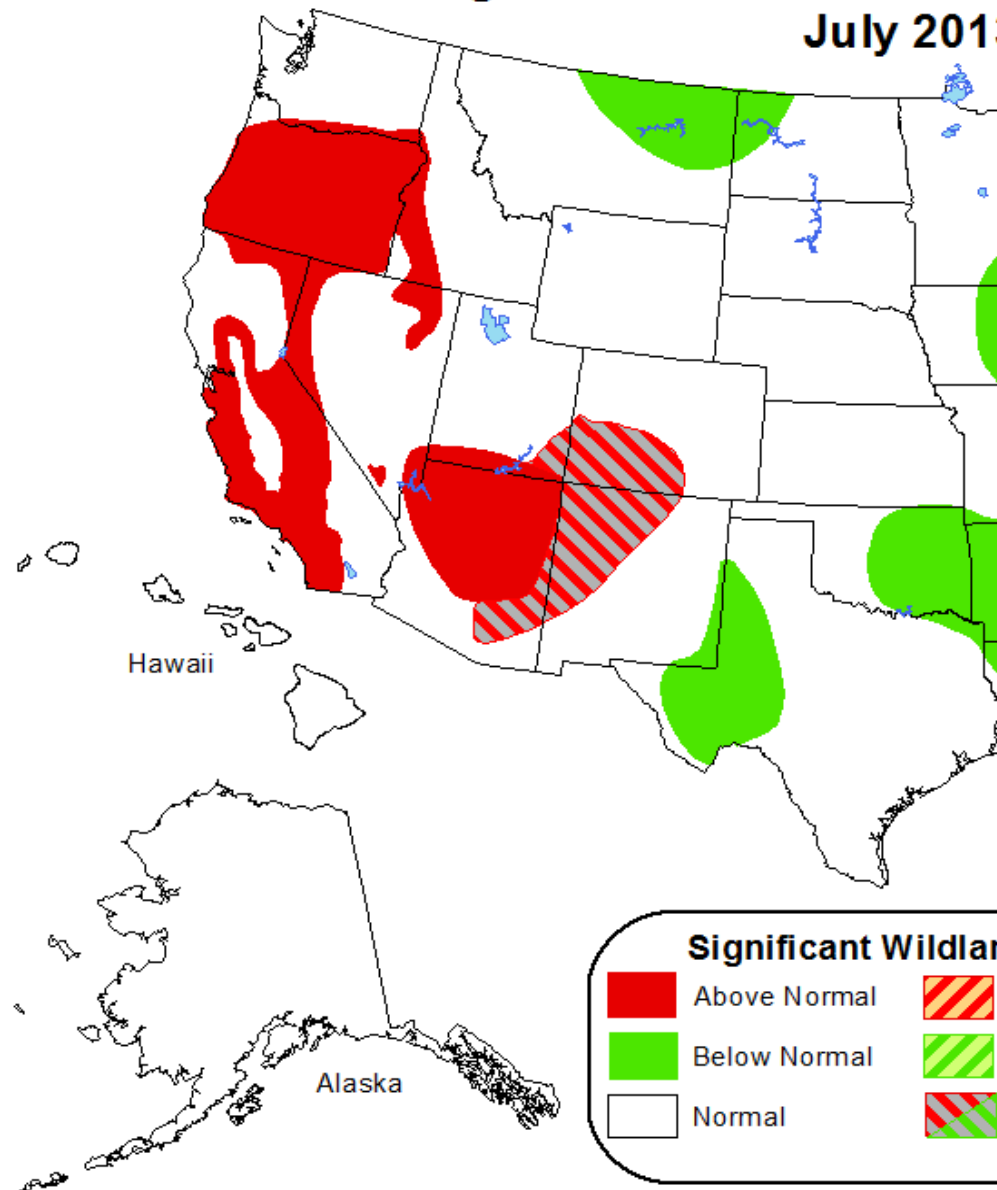

Precipitation

Likely continued drier than
usual over the interior Pacific Northwest

Significant Wildland Fire July 2013

NWCC Predictive Services outlook for: **July 2013**

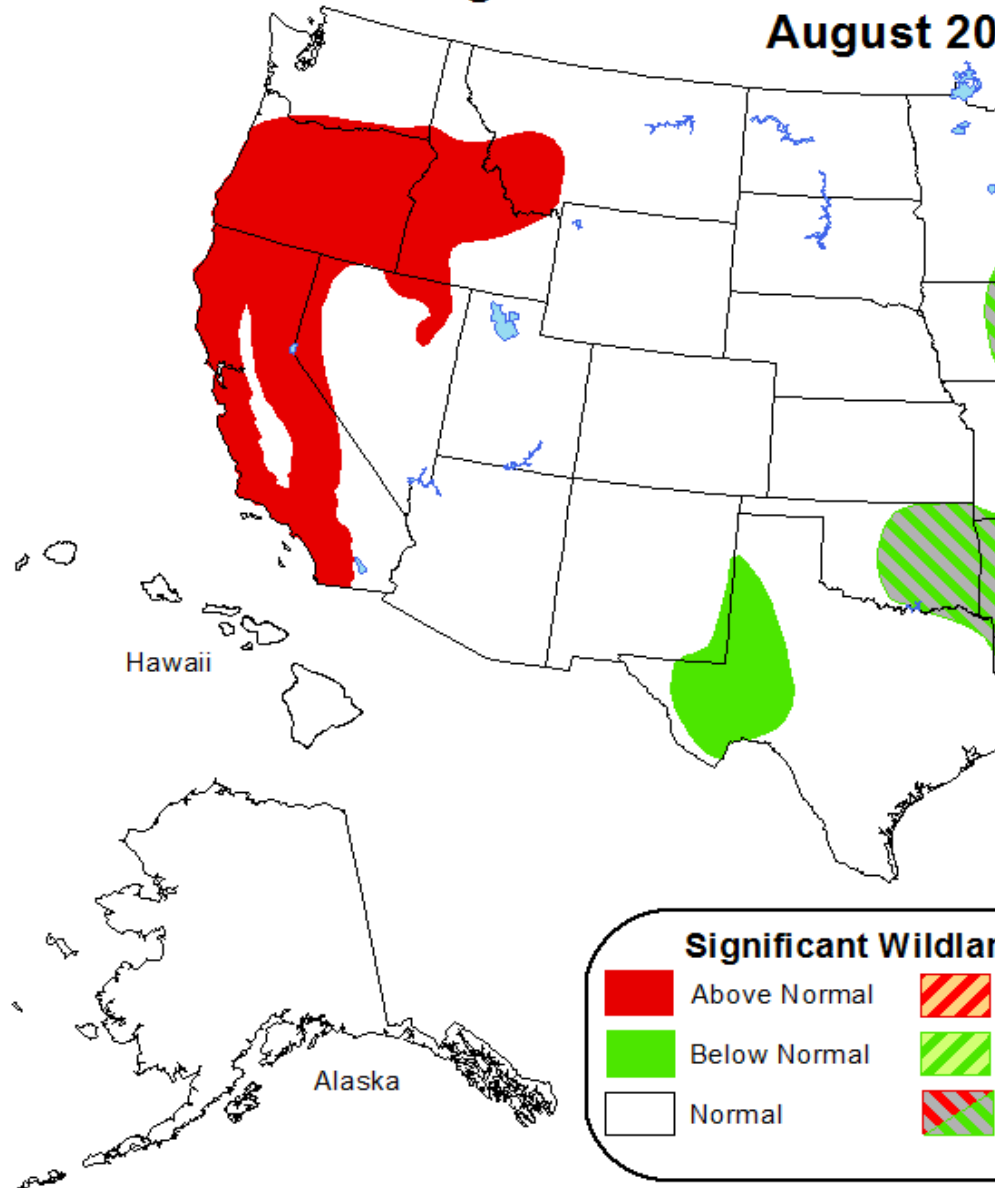

Late June rains helped reduce fire danger for early July. However, July is expected to be warm and dry and much of Oregon is considered at elevated risk for large, costly fires.

Above normal significant wildland fire potential indicates a higher than usual likelihood that wildland fires will occur and/or become significant events. Wildland fires are still expected to occur during forecasted normal conditions as would usually be expected during the outlook period. Significant wildland fires are still possible but less likely than usual during forecasted below normal periods.

Significant Wildland Fire August 20

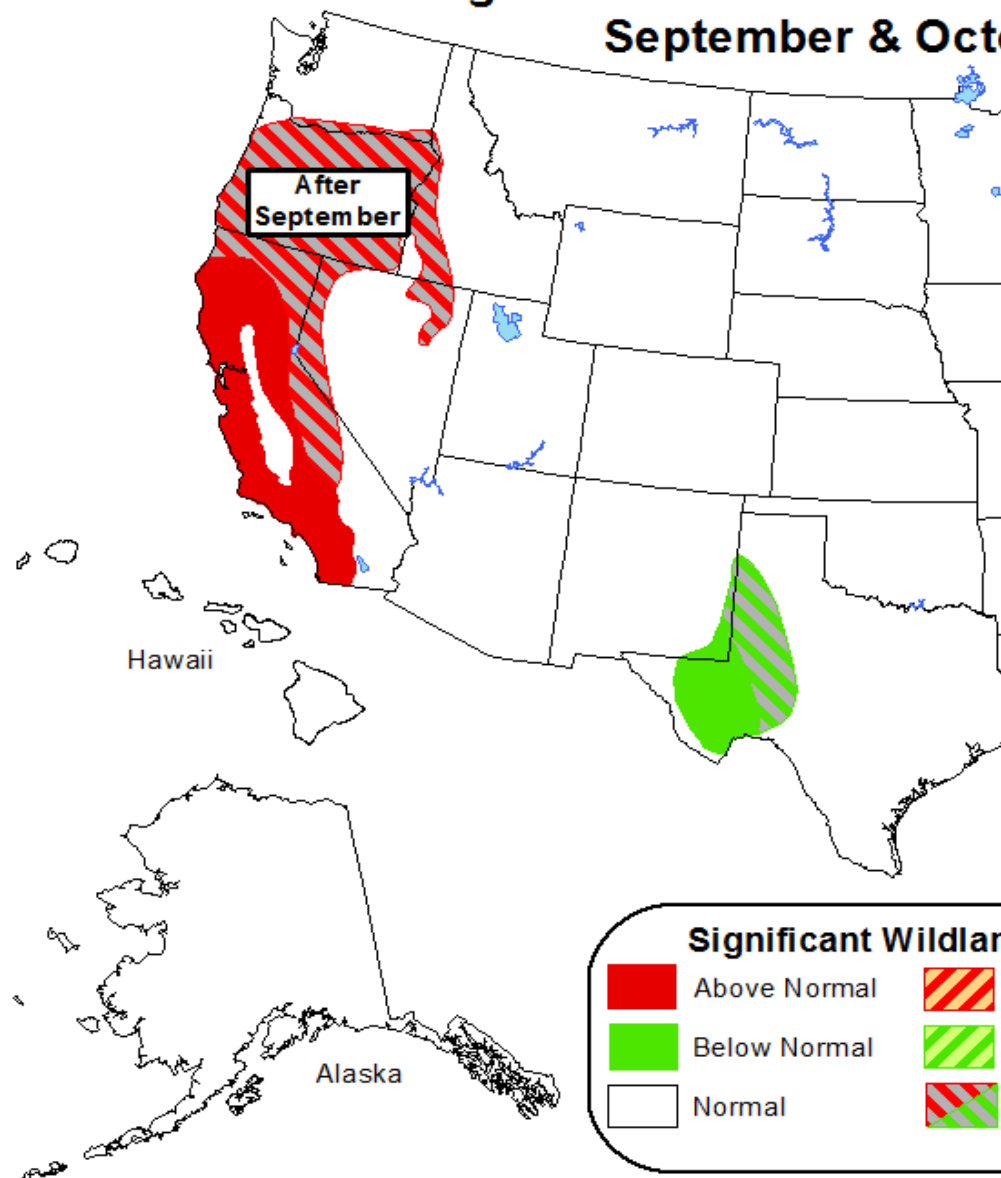

Above normal significant wildland fire potential indicates a higher than usual likelihood that will significant events. Wildland fires are still expected to occur during forecasted normal condition during the outlook period. Significant wildland fires are still possible but less likely than usual.

NWCC Predictive Services outlook for: **August 2013**

Dry trends expected in July will continue into August and continue the threat of large and costly fires over much of Oregon and sections of Washington.

Much depends on the amount of lightning received.

Significant Wildland Fire September & October

NWCC Predictive Services outlook for:

Sep and Oct 2013

August heat and dryness
extending into
September could
prolong the fire season
for Oregon and parts of
Washington. Returning
to normal in October.

**Concentrated lightning
decreases after early Sep**

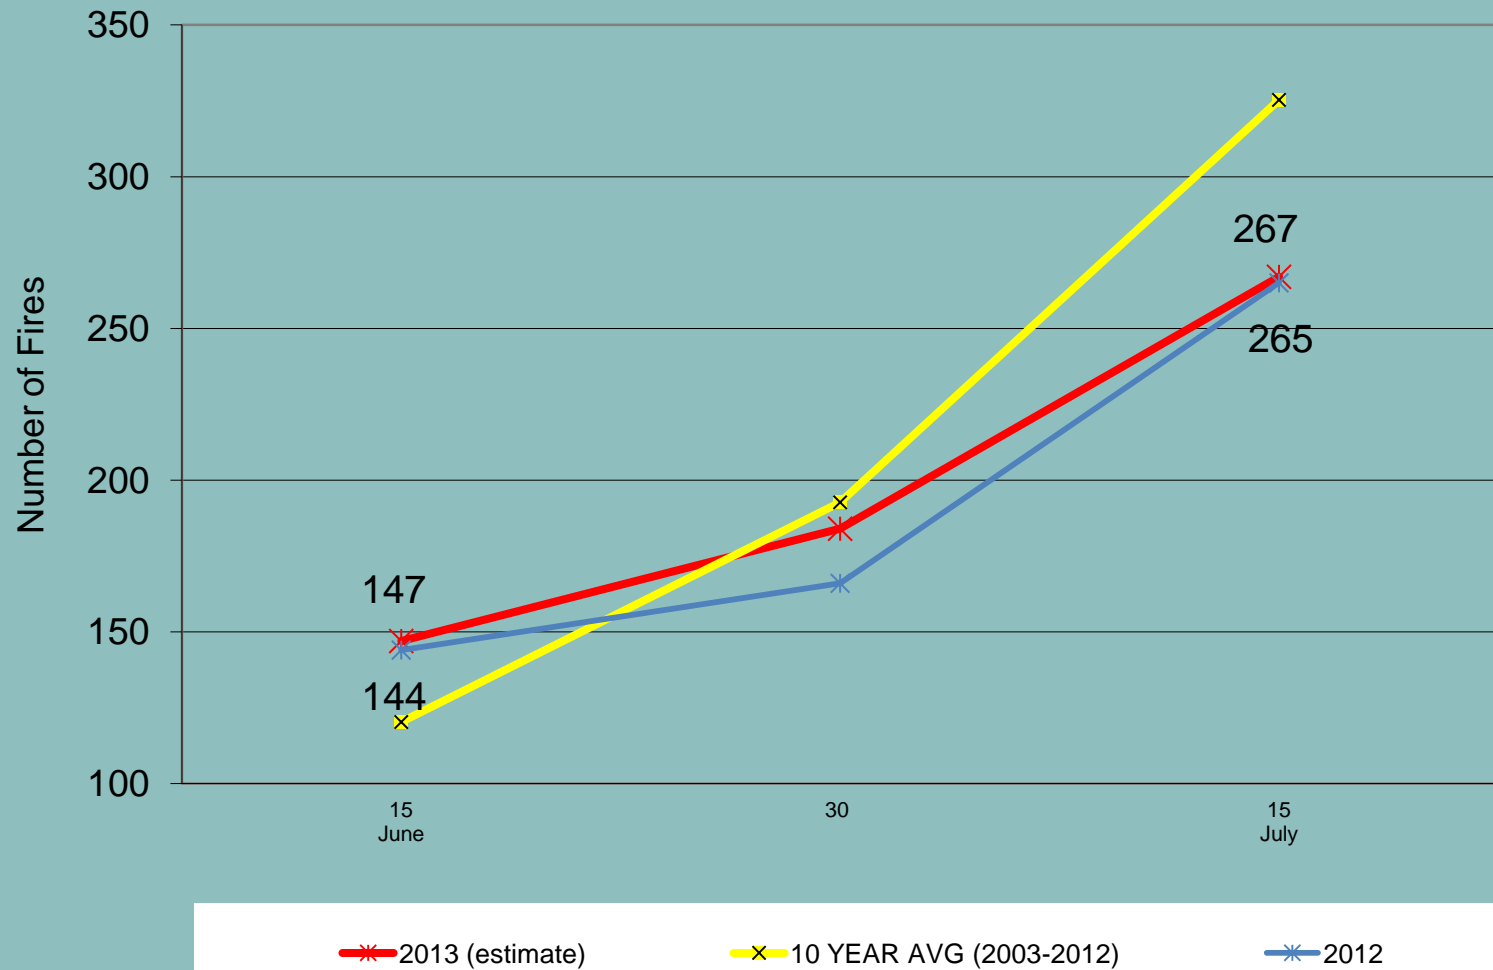

Above normal significant wildland fire potential indicates a higher than usual likelihood that wildland fires will occur and/or become significant events. Wildland fires are still expected to occur during forecasted normal conditions as would usually be expected during the outlook period. Significant wildland fires are still possible but less likely than usual during forecasted below normal periods.
